Subject: Revised Refillable Bait Station Label - 9688-EOR (291)

Hello John,

Based on our email correspondence and then our conversation at the meeting with Lois Rossi a couple of weeks ago, we have revised the label for our new Refillable Mouse Bait Station to reflect that it will be marketed without bait preloaded. As we discussed the RMD indicated that the unit had to be sold prefilled but from our conversation, that has changed.

The label was revised by modifying the directions for use, the Net Weight statement and removal of a number of marketing claims indicating that the unit was prefilled/preloaded.

We would appreciate your substituting this label, dated 2/9/2011, for the set previously submitted. The original version should be discarded. Since we are running on a very tight timeline and have the June compliance date coming up soon, we would very much appreciate anything you can do to expedite this registration prior to its PRIA Decision date.

EPA Rile Symbol: 9688-EOR (291)
OPP Decision Number: D-443676
Submitted To: John Hebert
Date: 12/16/2010

Thank you in advance.

Bill Metzger
United Industries Corp.

PS - Could you please send a confirmation that you have switched the labels for my records.
